Resource Management
Technology Management

Online learning is mediated by diverse technologies. Successful online learners are able to use these technologies skillfully and use the following strategies for their technology management.

01

Navigate Learning Management System (e.g., Blackboard)

Navigate the interface of Blackboard so that you are familiar with functions necessary for your online learning.

RESOURCE:
Blackboard Learn for Students

02

Use Microsoft Office or Google Tools

Use effectively Microsoft office or Google tools including Google docs because a majority of online assignments require you to use these tools for your online learning.
